

Success Story

A Dialysis Machine Restores Hope for Patients in Harib District

In Harib District, Marib Governorate, kidney failure patients endured daily suffering. Mohammed Al-Otair Hospital faced a severe shortage of dialysis machines, and many patients had to travel long distances in search of a life-saving session.

As part of its efforts to support health services in the hardest-hit areas, the Coalition of Relief and Building (CRB) provided the hospital with a new dialysis machine, enabling it to receive more patients and offer regular sessions without long waiting lists.

Patients expressed deep relief at this change, affirming that the new machine has eased burdens that weighed on their daily lives—turning long-standing suffering into a story of hope.

> **"This support came at a critical time, and the machine will make a real difference in the hospital's ability to save lives."**
>
> — Dr. Suleiman Al-Musalmani, Hospital Director

10-Year Harvest

Coordination & Partnerships

We work within the humanitarian coordination system for health, in partnership with local, regional and international donors and organizations.

OCHA Clusters	**UN OCHA and the Humanitarian Clusters** Active participation in clusters and technical committees
YHF	**Yemen Humanitarian Fund** Official implementing partner of the YHF
